Adjustable Hinge Adjustment Instructions

1. Remove access cover by depressing point "A" and pulling it outward.

- 2. Loosen 4 mounting screws on each strap, but do not remove screw.
- 3. Open door to break seal with magnetic gasket.
- 4. Adjust tip of door up by turning top hinge adjustment screw clockwise (opposite for Left Hand Door) and the bottom hinge adjustment screw counter-clockwise (opposite for Left Hand Door) so door spacing is even.
- 5. Tighten 4 mounting screws on each hinge.
- 6. Replace cover by inserting point "A" first.

TURN COUNTER-CLOCKWISE FOR RIGHT-HAND DOOR TURN CLOCKWISE FOR LEFT-HAND DOOR
